

Instruction for Low Carbon Growth Discussion on 24th March

Objective

1. To be familiar with country-specific carbon mitigation polities
2. To be able to critically evaluate each country's policies
3. To understand the mechanism between the global goal and the individual countries' goal

Steps

1. Read uploaded INDC for your country.
2. Read necessary articles on Carbon Mitigation Policies in **Energy/Energy Efficiency and Transportation Sectors**.
3. Understand the specific policies (not only abstract goals, but actual policies to be implemented to achieve the goals) in these sectors.
4. Critically evaluate these policies in terms of Feasibility, Efficiency, Desirability....
5. Study how these policies will impact people's life in the country.
6. Prepare a presentation (10 min) presenting 1~5 items above.
7. And prepare for the critical questions from other countries. (3 min)
8. State your own criticism and recommendations for your country. (2 min)
