

ECO663 Instructions for the First Presentation and Report.

- An experiment to test your own research interest/hypothesis to be designed for your course project.
- The project should be conducted either by an individual or a group of two students.

Contents should be included for the 1st presentation and report:

1. The topic of your choice for your own experiment
2. Brief description of the topic.
3. The reasons of your selection.
4. Brief idea of your experiment.
5. Literature review of three most-related articles to your topic.

<Presentation> November 6th, during the regular class hour. Max. 15 minutes each. All in English.

Prepare a power point presentation including the contents above.

<Report> Due on 23:59 on Monday, 16th November. Send by e-mail. No page limit.

Update your report by incorporating any suggestions/modifications/additions discussed during your presentation. Format and write your report as if you are writing 1. introduction and 2. literature review for a journal article.
