

# ECO663 Course Project Presentation Instruction

Presentation time: 12 mins + 3 mins Q&A per group

\*Practice well before the presentation and make sure that you will not exceed the time limit.

## Structure

### 1. Introduction

- Objective(s) of your research
- Hypotheses to be tested
- A brief background information such as basic concept, existing literature

### 2. Methodology

- Structure of Statistical/Econometrical Analysis  
(factors for ANOVA, regression model specification etc.)
- Experimental Design/Survey questions related to your main research topic

### 3. Data Analysis

- Summary Statistics (using Table, Figure)
- ANOVA Result (ANOVA table, Figures)
- Linear Regression Analysis Result all with interpretations, findings, comments etc.

### 4. Policy/Business Implications, Suggestions

- State your original findings and contribution
- Consider implications for a policy/business

### 5. Difficulties/Limitations

- State any difficulties you've encountered during designing and implementing the survey.
- State the limitations of your study

## NOTE:

- Avoid using small fonts and the large amount of texts in each slide.
- Itemize important points, not a long sentence.
- Do not copy-paste from R (or other applications') output directly to the slides. You should generate clear/simple looking tables. Again, avoid small fonts which nobody can see.
- Make it Fun! so that you can ENJOY your presentation and can SHARE your exciting discoveries with your classmates.
- I'm very much looking forward to listening to your interesting/exciting findings!

GOOD LUCK
